PREMIUM OUTDOOR FURNITURE

Collections 2024

Apple Bee **2024**

The Apple Bee purchase catalogue 2024 has been specially compiled for you as a purchaser. It includes compact, clear, and useful information of each collection. All the outdoor furniture shown here, is available per container and most of the items will also be available through our warehouse in Dongen, the Netherlands.

We want to help you as our Apple Bee dealer to make your sales as easy as possible. In addition to sizes and weights, you will also find information about the fabrics, materials used, maintenance and much more. All the information you need to properly advise your customer!

Apple Bee can also support you if you are looking for custom made production. We would be more than happy to welcome you in our 400 m2 showroom in Dongen and talk over the possibilities. Hope to get in contact with you soon and wish you a successful season in 2024!

WHY APPLE BEE?

OUR DESIGN

Apple Bee's collections clearly show designers with passion for their craft. Designers who stand in the tradition of Dutch Design in which the keywords minimalist, experimental, innovative, unconventional and with a sense of humour are clearly recognisable. No baroque excess, but rather to-the-point and pure. The design focuses on the purpose, the function. The interplay of lines and the materials used make the furniture unique. That is why Apple Bee garden furniture remains a delight even after years, because pure design quality is timeless.

DESIGNERS

Sako Wijma loves pure lines. Form follows function, so functionality remains leading. The design serves that purpose. Which is not to say that there should be no fun in the design; on the contrary! But always embedded in the overall picture of tranquillity and balance, in which the power of the lines is preserved. Sako pursues this peace and balance not only in lines, but also in a mix of materials. People often experience a sense of luxury and comfort from this. Although you can characterise his work as minimalist, his design is never strict and rigid, but rather friendly and inviting. After all, in this too, form follows function. People are central; the design is there for them.

Sako

Ralf de Bruin designs products that are aesthetically refined and durable. He likes to work with luxurious and natural materials that you can enjoy for a long time. To experience peace, space is necessary. You can see this in Ralf's designs. He is careful - almost reserved - in the choice of elements he uses. He consciously uses the empty space between the different elements to create a pleasant visual tranquility. Symmetry and a combination of organic and geometric elements play an important role in his design. This creates a contrast that continues to fascinate, making the design still interesting to look at even after years.

Ralf

CERTIFIED TEAK

At Apple Bee, we value craftsmanship. That is why we work with premium materials, such as teakwood, for many years. We only use certified teak from sustainably managed and controlled plantations. Natural teak has a honey-brown colour. Because of its natural oil content teak is the best possible wood for outdoor use. In an outdoor environment the colour will change from honey-brown into a nice silver-grey patina colour. For many people this is the reason to choose a teak product. To preserve its natural colour Apple Bee offers several finishes to maintain your products. Beside a teak cleaner and a teak shield, we developed our own products to restore the unique Coastal and Antique colour. An extensive teak care guide on our website explains how to clean and care for your teak product. Scan the QR code to see the teak care guide.

TEAK CARE

Apple Bee wood is Earth-friendly

Teak is the best and most valuable thing nature has to offer in terms of wood. We make our teak furniture from wood grown at the plantation forest. This is a big step forward to conserve the nature forests.

Teak contains many natural oils, which serves as a natural protective layer on the wood. Apple Bee already pre-treats all teak furniture with anti-fungus during the production, which is designed to kill mould and mildew spores inside teak. For outdoor use, teak furniture will be exposed to rain, sunlight, dirt, moisture and fungi, and therefore taking care of outdoor furniture is important.

Apple Bee - Teak cleaner

Apple Bee Teak Cleaner is specifically designed to kill mould and mildew spores inside teak. It contains both cleaning and brightening ingredients.

Article No: OV0010 | EAN: 8718091508382

Apple Bee - Teak color restore Antique

Apple Bee Teak Color Restore Antique is specially developed for Apple Bee teak furniture with Antique finish. After a while the Antique color will fade out. The treatment protects teak and helps it retaining its natural warm color. Apple Bee Color Restore Antique generally lasts for the entire season without turning black or gray. The duration depends upon factors such as exposure to sunlight, humidity, rain, the age of the teak, and some other factors.

Article No: OV0011 | EAN: 8718091508399

Apple Bee - Teak color restore Coastal

Apple Bee Teak Color Restore Coastal is specially developed for Apple Bee teak furniture with Coastal finish. After a while the Coastal color will fade out. The treatment protects teak and helps it retaining its natural cool color. Apple Bee Color Restore Coastal generally lasts for the entire season without turning black or gray. The duration depends upon factors such as exposure to sunlight, humidity, rain, the age of the teak, and some other factors.

Article No: OV0013 | EAN: 8718091516578

Apple Bee - Teak shield

Apple Bee Teak Shield slows the growth of algae and fungi and helps to maintain teak's silvergrey color for a long period of time, without getting green deposits. We recommend treating teak with Apple Bee Teak Shield at least once a year. Tabletops should be treated more often, depending on the frequency of use. Extreme green deposit can occur under some conditions, such as exposure to long periods of damp. In this case, it is advisable to apply Apple Bee Teak Shield at least twice a year.

SOUL COFFEE TABLE

LIGHT WEIGHT CONCRETE (LWC)

Light weight concrete has a core of so-called fibre reinforced cement board. In Europe and in the USA, this is also used for facade panels to decorate exterior walls because of its many advantages. It's very strong, durable, stable and it can withstand the elements water and fire.

Apple Bee has chosen the same base material for its light weight concrete tops, making these tops solid, stable and – unlike other resin materials – Apple Bee LWC tops perform very well under all kinds of weather conditions. The combination of a beautiful design and this quality material ensures that Apple Bee LWC tables provide many years of enjoyment.

POWDERCOATED ALUMINIUM

Aluminium is a very lightweight and rustproof material, which makes it perfectly suitable for garden furniture. The material is often used in combination with materials which enhance the properties of the lightweight metal, such as wicker, teak, and rope. But we also have some collections made entirely of aluminium, such as the Delgado Lounge. We use aluminium for the basic frames of all our furniture, as it is lighter than steel and rust proof. For wickerwork furniture, our Biculair® weaving material is woven around the aluminium frame. We produce these aluminium tubes in-house, so we are unlimited which form and shape of the required profiles. Woven or not, we always powder coat our frames. The UV resistant powder coating protects the aluminum against all weather conditions.

BEE WETT® CUSHIONS

Premium technology

Apple Bee furniture is made of the highest quality materials. The same certainly applies to the cushions. Our Bee Wett range consists of special weather-resistant cushions that you can simply leave outside throughout the season / year. The removable cover is made of the best possible materials, which are all washable. As well as being waterproof, the material is also guaranteed to be UV-resistant. Unlike normal foam, the unique Bee Wett® filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that your Bee Wett cushion dries incredibly quick compared to other cushions. The Bee Wett cushion is upholstered with an Olefin cover that is resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The premium Bee Wett technology guarantees the cushions to dry quickly after heavy rain.

Care

For many years we have been supplying Apple Bee furniture together with the highest-quality, care-friendly Bee Wett® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibres and to immediately remove spilled liquids and other substances.

Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a delicate fabrics programme at a maximum of 30 degrees.

NOTE: always rinse the covers thoroughly! In order to retain the cushions' water-repellent layer you can add a little Harmisol or simi-

lar to the last rinsing. Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine program is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibres pull the cover nice and tight around the filling as it dries.

DRAIN

The open fabric structure on the bottom of the cushion drains all moisture perfectly

ROPE & BELT

Among other materials, Apple Bee uses 'rope' as a weaving material. This is machine made rope with a PVC woven core. Durable water-resistant soft fibres which are woven around the furniture frame. So this rope offers the best of both worlds: solid quality with little stretch and a nice soft and comfortable touch. But we also use a combination of rope with belt. The combination of these two weaving materials, resulted in a new weaving structure characteristic for Apple Bee. The round "vertical rope" and the flat "horizontal belt" create an exciting pattern of lines. The way the round "rope" is woven around the frame shows the master's hand.

There are several properties that make rope useful for outdoor furniture. It is particularly strong, easy to maintain, durable and dries quickly. The rope we use at Apple Bee is UV-resistant, preventing discoloration by the sun!

The "belts" in our furniture can be processed in different widths and are produced of the same durable, and water- and UV-resistant soft Olefin fibres as the Sunproof fabrics used for our cushions. This creates a comfortable piece of furniture, even without adding a cushion. Because of this difference in widths and designs, our designers constantly achieve a completely different look for our furniture.

Maintenance

Cleaning rope and belt furniture is easy. Firstly remove loose dirt and dust from the furniture using a soft brush or Hoover with a brush nozzle. Make a mild detergent by mixing mild soap with warm water. Dip a soft brush or sponge into the solution and gently scrub the rope surface. Avoid harsh detergents and scrubbing too roughly as this can damage the fibres. Rinse the rope with clean water to remove soap residue. Use a garden hose or a bucket with clean water. Let the furniture air dry or use a clean cloth to dry it off. Make sure the furniture is completely dry before storing or using it. Repeat these cleaning steps regularly, depending on use and exposure to the elements. This will help prevent dirt build-up and preserve the furniture's appearance.

BICULAIR® WICKERWORK

Apple Bee furniture is entirely handmade. The frame is manufactured from aluminium, with no concessions made in wall thickness or finish. The welds are of first-rate quality, the screws are of high-grade steel, and the frame is anodized in a matt or high-gloss finish, or treated with color epoxy.

A unique feature of the range is that the frames are woven with special Biculair® wickerwork, originally developed for professional use. This highly durable imitation rattan fibre (HDPE) is fully weather-resistant, colorfast, recyclable and environmentally friendly. This means that the appearance and performance of the furniture is not affected by the European weather conditions and that the colors retain their natural quality, even better than real rattan! The top-class quality of this wickerwork, tested by the Netherlands Organisation for Applied Scientific Research (TNO), stands out against that of other comparable wickerwork.

Our garden furniture is covered by a 3 year warranty, which extends to material and manufacturing defects, under normal usage. The warranty excludes:

- Damage through use;
- Scratches;
- Stacking damage;
- Loosening / detachment of plaited strands;
- Fine cracks in wood;
- Turning grey / discoloration of wood;
- Standard cushions.

Defects that are the result of incorrect or improper use (for example: abnormal loads, damage from aggressive substances, incorrect assembly or maintenance, repairs by non-experts, etc.) are also excluded. This warranty does not entitle the purchaser to compensation. Any claims or warranty should be made through the supplier, on presentation of the sales receipt. For more information and practical tips on the warranty and maintenance, visit www.applebee.nl or email: service@applebee.nl.
